Stephen is a good TA as he is good at explaining the concepts and choosing the practice problems.	I truly wish that the TA or the prof of the class could provide us with the answers to the homework problems so that we can learn from our own mistakes.
The discussion is an excellent place to actually learn the material, and enforce the topics you've seen in class	Stephen was a great TA. He really helped me understand some of the harder stuff that was covered in lecture
McKean was incredible. Best TA I have ever had. Bray teaches the course amazingly well.	
Stephen is an amazing teacher. He could easily teach a course of his own.	no

TCE Comments For MATH 216D.09, 2020 Sprng / McKean, Stephen Henry

<p>Stephen did a good job preparing questions for lectures and interacting with students; he often guided students, but always allowed students to make connections on their own. Fun and engaging!</p>	
<p>Discussion is a great way to reinforce the content being taught in lecture and through the prelecture videos. I feel that by participating more in discussion I was able to learn more in the class.</p>	<p>I really liked Stephen McKean. He was clearly very invested in our learning and was also someone very easy to talk to. He is very knowledgeable as well and good at explaining complicated concepts. Anyone in his classes in the future will be lucky to have him.</p>
<p>This course is very different from any previous math class so be sure to devote a significant amount of time in order to stay on top of your work.</p>	<p>Stephen was engaging during discussion and simplified complicated topics. On a personal level, he was very generous with his time and made time to meet with me to go over certain topics. I am very appreciative of his help.</p>
